Our expertise in fenceless automation sets us apart, ensuring a secure and efficient workplace environment. With our innovative technologies and dedicated support, we empower our clients to thrive in a safe and productive workspace.

Experience the difference with AIRSKIN—**where safety meets innovation**.

AIRSKIN® Safety Services

Overview of our Safety Services:

Safety concept with partial risk assessment

AIRSKIN collaborates with clients to formulate a customized safety concept that aligns with the unique requirements of their operations.

Force measurements for risk assessment

According to ISO/TS 15066, force measurement for collaborative robot safety, ensuring compliance with standards, and enhancing safety and efficiency in human-robot collaborative environments.

Risk assessment for a CE marking

Evaluation of all individual components or processes to pinpoint potential hazards.

CE marking – Preparation of all documents without signature

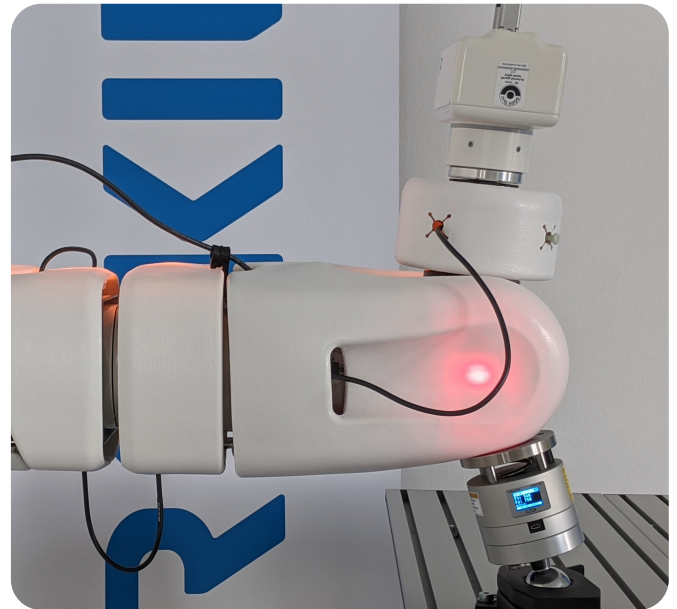

We prepare all necessary documents for CE marking, without our signature. Our goal is to facilitate compliance with regulations on the EC declaration of safety and streamline the CE marking process for you.

Complete CE marking with signature

AIRSKIN provides a complete CE marking with a signature, ensuring that your plant meets European Union safety standards and regulations.

Design of custom AIRSKIN products

From initial concept to final implementation, we work closely with you to ensure that the custom AIRSKIN product meets your exact specifications, providing optimal performance in your application.

Overview of our additional Services:

Technical and Sales training for AIRSKIN Products

Providing clients with a deep understanding of the technical intricacies of AIRSKIN's safety technology.

Technical support for AIRSKIN and applications

AIRSKIN is primarily focused on efficiently resolving any technical challenges or concerns that clients may encounter.

Technical consulting for applications and safety

We ensure that clients not only deploy the technology effectively but also adhere to the highest safety standards in their applications.

Installation of AIRSKIN products

We ensure problem-free installation of AIRSKIN products and thus guarantee seamless integration and optimal functionality at customer's site.

Lending AIRSKIN products

We provide customers with a flexible and cost-effective way to test our latest products.
